| <p><b>Problem Description</b></p> <p>Given an array <math>A</math> of <math>N</math> integers. Now, you have to output the sum of unique values of the maximum subarray sum of all the possible subarrays of the given array <math>A</math>.</p> <p><b>Note:</b> Subarray means contiguous elements with atleast one element in it.</p> <p><b>Constraints</b></p> <p><math>1 \leq N \leq 2000</math><br/><math>0 \leq  A_i  \leq 10^9</math></p> <p><b>Input Format</b></p> <p>The first line of the input contains a single integer <math>N</math>, the total number of elements in array <math>A</math>.<br/>The next line of the input contains <math>N</math> space-separated integers representing the elements of the array.</p> <p><b>Output Format</b></p> <p>The only single line of the output should contain a single integral value representing the answer to the problem.</p> |         |         |                      |                        |
